5 Core Strategies for Mastering Cloud Migration & Modernization

In today's dynamic retail landscape, migrating to the cloud isn't just an option—it's a necessity for agility, scalability, and innovation. Dive into Nisum's holistic approach to cloud migration and modernization, where our state-of-the-art capabilities are reshaping businesses. Explore the transformative benefits we offer and discover how we drive retail success in the digital age.
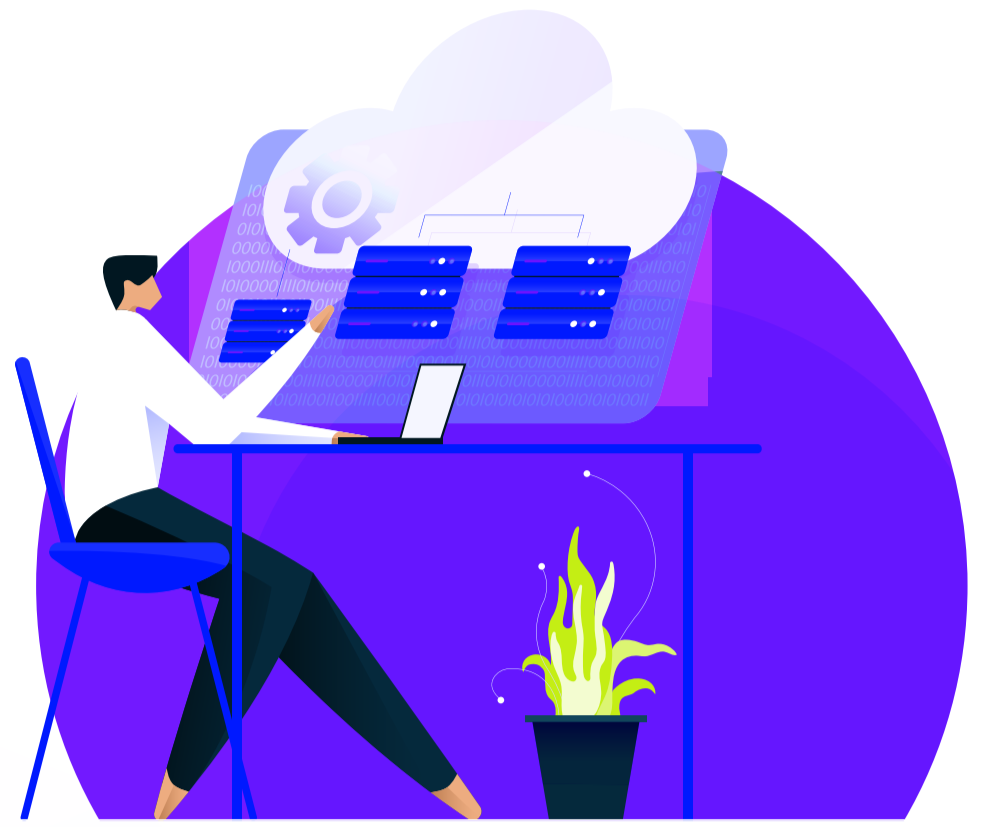

WMos for Optimized Omni-distribution Capabilities

Nisum's bespoke WMoS optimizes omni-distribution, bridging the online and in-store gap. It prioritizes automation and seamless cloud integration streamlining order processing and integration across platforms.

Results You Can Expect:

+400%

increase in unit transactions per day per fulfillment center

Cloud Migration for Enhanced Scalability

Nisum's expertise in cloud migration transforms traditional on-prem OMS infrastructure. Our approach guarantees enhanced scalability, reduced infrastructure overheads, and expedited order processing, leading to cost efficiency, heightened processing capacity, and an enriched user experience.

Results You Can Expect:

+200%
increase in order processing capacity

+20%
projected increase in processed orders

Real-Time Analytics for E-commerce Excellence

With our state-of-the-art cloud-based platform, Nisum offers invaluable real-time e-commerce analytics, tailoring offerings to online behaviors that diminish cart abandonment and amplify sales and predictive customer insights.

Results You Can Expect:

-37%

estimated decrease in abandoned shopping carts

## GCP for Data Transfer & Processing Innovation

Nisum leverages Google Cloud to accelerate data transfer rates, ensuring precision. Our solution is adaptable, priming businesses for international expansions, leading to speedy data transfers, enhanced accuracy, and global scalability.

Results You Can Expect:

$335MM

increase in product information transfer rate

Azure for Efficient Order Data Management

Nisum's prowess in Azure cloud transforms order data management systems, refining data streams, and augmenting report generation velocity which provides rapid report generation, economical operations, and strategic business insights.

Results You Can Expect:

+25%
increase in cost savings

+30%
acceleration in project execution
